BIA Introduction

The Business Impact Analysis template is a tool to assist departments in performing a Business Impact Analysis (BIA). This template serves as a comprehensive resource, allowing departments to fully assess the loss of a function and the related impact rather than specific emergency events.

The template is designed to be used once departments have compiled a listing of all of their business functions. Each function then is analyzed using this template and the results recorded. The weights of the risk factors should be modified by the department to customize them to the department's environment. The template organizational nomenclature may be revised to meet individual department structures.

When all business functions have been analyzed the overall results are then entered into the BIA Overall template (separate worksheet) to project an overview of the impact of all functions. The COOP team should then meet to normalize the results and provide consistency. Once final, the COOP team must decide where to draw the line to designate which functions are essential. There also may be some functions that are only performed in an emergency and the department may wish to add those in without scoring.

Department Name BUSINESS IMPACT ANALYSIS (BIA)

Business Function: Name of business function

Division: Name of Division, or change this as needed for department organization
Business Function Owner Name & Telephone #: Name and telephone of business owner

Date Completed: Completion Date

Person Completing BIA: Name

A. Describe the primary objective of this business function & customers/interfaces: Objectives:

4	r.	.ctc	ma	rs/I	nto	rf-		
١	Ll	JSTC	me	rs/1	nte	гта	ces	

B. Is any sensitive data* used in this business function?	Yes/No	
*NOTE:		
Sensitive data is any data of which the compromise with respect to confidentiality, integration	rity, and/or availability	
could adversely affect COR interests, the conduct of Agency programs, or the privacy to	which individuals are	
entitled.		

Describe the Sensitive Data: Indicate the type of sensitive data

Weights should be changed to reflect the environment for your department. Scores for each of the sections below are to be entered into the BIA Overall template to get an overview of the impact for all functions.

C. Analyze the potential harm that would ensue if this Function were not performed:

	Level** (3,2,1or0)	x	Weight (fixed)	=	Score
<u>Life</u> Potential someone could die			5		0
Safety Potential someone would be harmed			4		o
Finances Potential assets or dollars would be lost			3		0
Legality Potential compliance or other lawsuits/sanctions			2		0
Customer Service/Publicity Potential harm to customer service level/base and/or harm from adverse publicity			1		0
Sensitive Data Potential adverse affect on the City's interest/programs or citizen privacy			3		0
<u>Inaccurate/Missing Data/Records</u> Potential for inaccurate or missing data/records			3		0
Business Impact Total:					0

**Levels:

High = 3, Medium =2, Low=1, None=0
